

Meeting Minutes: Project Handoff

Project: Venue Booking Management System (VBMS)

Subject: Code Review and Test Plan Foundation

Meeting Information

Date: April 10, 2024
Time: 16:47 – 23:05 (Asynchronous Communication)
Location: Digital Coordination Channel (WhatsApp)
Participants: Abdul Wasay Imran (Testing Team), Maryam (Development Team)

1. Objective

The primary goal of this session was to acquire the source code, Software Requirement Specification (SRS), and system architecture details for the Venue Booking Management System to initiate Phase 2 of the Software Testing Project.

2. Functional Overview

The system is built around three primary user roles:

- **Student:** Can browse buildings/rooms and book them. Includes logic for "Already Booked" status and "Time Conflict" validation.
- **Program Office (PO):** Responsible for the approval workflow (Accepting/Rejecting booking requests).
- **Admin:** Possesses full privileges, including request management and the ability to modify the infrastructure (Adding new buildings and rooms).

3. Technical Specifications & Access

- **Repository:** <https://github.com/AmanTheDrummer/IBA-VBMS>
- **Active Branch:** full-fix
- **Environment Setup:** `npm run start:dev` (Backend) and `npm run dev` (Frontend).

4. Test Data Provided

The following credentials were provided for the execution of functional test cases:

Role	Username/ERP	Password
Admin	admin	admin123
Program Office	po001	password
Student	12345	password

5. Key Decisions

- The SRS PDF will be used as the ground truth for Expected Results.
- Testing Team will analyze the API structure within the source code to develop unit test cases.

1 Communication Transcript

The following table logs the primary correspondence regarding the handoff of the system components.

headergray Time	Sender	Message / Action
16:47	A. Wasay	Requested SRS, project idea, video demo, and API code access for unit testing.
17:06	Maryam	Shared <code>srs.pdf</code> and confirmed access request.
22:15	Maryam	Shared GitHub Repository link (<code>full-fix</code> branch).
22:16	Maryam	Provided deployment commands: <code>npm run start:dev</code> and <code>npm run dev</code> .
22:17	Maryam	Provided test credentials for Admin, PO, and Student roles.
23:05	Maryam	Provided audio briefing explaining the role-based dashboard logic.

Minutes recorded by Abdul Wasay Imran

A Appendix: Communication Log
